

Advances in Technology:

Expand and improve the application and effective use of technology across the College.

- Maintain the institutional commitment to implementing the goals of the Information Technology Strategic Plan by enhancing:
 - a. The security of technology assets
 - b. Business continuity/disaster recovery/failover processes
 - c. Network capabilities across the college
 - d. The quality of online teaching and learning
 - e. The use of existing technology
 - f. Technology support for end users
 - g. College service offerings and processes via the Web
- Promote a climate of innovation in using technologies that enhance student success and administrative effectiveness.

Strategic Agenda
2010-2013

Strategic
Themes and Goals

202 South Halsted Street
Chicago Heights, IL 60411
(708) 709-3500 | prairiestate.edu

Start near. Go far.

These themes and goals provide the foundation for PSC's Strategic Plan for 2010 through 2013. They will be translated into realistic and meaningful actions to build and operationalize the plan, a plan aimed at continuing to improve our services to students and the community, strengthening PSC as an institution of quality teaching and learning.

A Learning Environment for Student Success:
Advance our learning-centered culture, promoting student success in an atmosphere of respect, professionalism, and high academic standards.

- Promote a climate that fosters creativity and innovation to enhance teaching, learning, and assessment.
- Attract quality faculty who embrace student-centered learning.
- Encourage the hiring of faculty and staff who reflect the diversity of the students.

Targeted Recruitment, Improved Retention, and Increased Educational Attainment:
Improve recruitment of targeted student populations and strengthen academic performance, retention, and completion.

- Strengthen college-wide efforts to recruit targeted populations.
- Establish a systematic, evidence-based approach to improve student retention and completion.
- Develop effective pathways for ESL and adult basic education students to move from non-credit into credit programs.

Effective and Accountable Resource Management:
Ensure the effective use of human, financial, technological, and physical resources.

- Collect, analyze, and use data to implement best practices and measure progress in all areas of administration and resource management.
- Expand and improve professional development for employees to meet institutional goals.

Strong Community Partnerships:
Enhance current and develop new strategic partnerships.

- Develop a comprehensive approach for establishing, maintaining, and strengthening mutually beneficial partnerships.
- Collaborate with community partners on grant opportunities and other innovative ways to share resources.
